PipelineRx is a medication management services company committed to improving medication efficacy, patient safety and satisfaction.

By understanding each client hospital's operational workflow and clinical decision-making methodologies, PipelineRx has become a trusted and valued extension of its client's clinical pharmacy coverage. PipelineRx's remote clinical pharmacy services integrate seamlessly into a client hospital's operations by mirroring the client's exact medication approval and clinical verification processes. Via PipelineRx, all hospital pharmacies can now extend to all shifts the same clinical benefits and responsiveness achieved during their first shift.

Only PipelineRx delivers 24/7 access to clinically experienced pharmacy experts and order processing capabilities you need to:

- Enhance patient and med safety
- Review med orders on a real-time basis
- Cost effectively expand flexibility and options in pharmacy staffing
- Free up on-site staff for other critical functions and projects
- Improve support for formulary and clinical initiatives
- Reduce expenses associated with overtime and recruiting
- Provide cost-effective method for achieving compliance with Joint Commission
- Meet the increasing standards of med safety and demand for pharmacist review
- Minimize increasing labor costs
- Mitigate employee burnout
- Implement CPOE
- Manage cutover for a new PIS

You know Telepharmacy — a service model that is spreading in the healthcare community. You know the numbers — pharmacy workload is increasing.

Medication orders are growing at *three times the rate of graduating pharmacists*. With pressure to reduce costs, it's difficult to operate at peak efficiency. Add to that, there is magnified budget scrutiny and the expense of medication errors. Obviously, there's a problem.

PipelineRx is your clear answer.

PipelineRx

PipelineRx remote medication order processing typically saves hospitals 20% in hard dollar costs, as well as significant soft dollars, as measured by increased clinical interventions, avoided medication errors, happier internal hospital and pharmacy staff, and no recruiting costs.

Our proprietary HIPAA-compliant technology was designed for pharmacists by pharmacists to ensure the highest quality standards, optimal workflow and relevant management reports. With our web-based system, we can:

- Manage workflow queues
- Efficiently review and enter medication orders directly into your pharmacy system utilizing the same procedures your in-house staff uses
- Maintain a complete record of all medication orders, client interactions and clinical interventions performed
- Connect a dedicated PipelineRx Clinical Telepharmacist to a hospital, network, clinic or community pharmacy using high-speed voice, video and data communications
- Give you complete transparency of operations, billing, and detailed customizable reports
- Provide you with peace of mind with dedicated 24/7 support

Only PipelineRx vets and assigns a dedicated team of clinical hospital pharmacists — *not contractors* — to your pharmacy. Unlike other rigid, faceless remote medication order processing solutions, our team is trained and certified in your pharmacy's operations, policies, procedures and nuances. PipelineRx goes on site to meet with and get to know your nursing and medical staff and learn about the issues your organization faces. No other Telepharmacy provider spends the time to get to know you, your needs and your procedures like PipelineRx.

Embracing Telepharmacy and Remote Medication Order Processing right now can take your pharmacy operations further.

PipelineRx has the expertise, technology and personalized service to take you to where you need to go.

"My nurses are hooked. They depend on PipelineRx."

NY State client

- 
- 24/7 clinical expertise and medication management via a client dedicated pharmacist
 - Lower medication order verification costs by at least 20%
 - More time for your staff to implement critical projects
 - Medication errors reduced and improved patient care
